SUMMARY

I am Ibrahim El-Shabrawy, an Android Developer, dedicated to delivering innovative and high-quality tech solutions. I have expertise in building top-notch applications using Kotlin and Jetpack Compose, with a solid understanding of MVVM architecture and integration of cutting-edge tools like Hilt and Retrofit. I have contributed to the success of applications such as "Gannatak" and "Wajad", focusing on performance optimization and resolving complex issues, while also working on innovative projects like the "Haraj" platform. I am always eager to expand my skills and bring unique value to the projects I work on.

Work Experience

Junior Android Developer   Mar 2024 - Present
Visions Tech

- Developed Android applications using Kotlin and Jetpack Compose, focusing on creating interactive user interfaces and enhancing user experience.
- Contributed to improving the second version of the "Gannatak" app, an online marketplace for selling seedlings and providing agricultural consultations, by resolving complex bugs and optimizing performance.
- Played a key role in the development of "Wajad", an online school application, leveraging technologies such as Retrofit, Room, and Hilt within the MVVM architecture.
- Worked on building the "Haraj" investment platform for the Saudi market, implementing cutting-edge technologies to meet user needs.
- Consistently improved code quality and adhered to best programming practices.
- I have worked on modifying and improving Flutter projects, including troubleshooting, customizing UI designs, and integrating additional features to meet project requirements such as "Mr. Tayer", "Tayer Man", and "Tashilihi".

Projects

- Wajad App
  An online school app that provides students with interactive lessons, live classes, and a personalized learning experience, accessible anytime, anywhere.

- Gannatak App
  This application is an electronic store for agricultural seedlings and ornamental plants, and it has many consultants.

- Gannatak Consultations
  An application that is affiliated with the previous Janatk application and is specialized in Gannatak advisors.

- Haraj App
  Haraj is an investment platform that connects investors with diverse investment opportunities across various sectors, making it easy to explore, evaluate, and invest with confidence.

- Just Owl
  A special application for school buses to transport students to schools and universities.

Intern Android Developer   Jun 2024 - Mar 2024
[Visions Tech](#)

- Successfully completed a comprehensive training period at Visions Tech, focusing on mastering Kotlin, Jetpack Compose, and advanced Android development concepts.
- Acquired hands-on experience with modern tools and frameworks, including Hilt for dependency injection, Retrofit for API integration, and Room for local database management.
- Applied training knowledge to real-world projects, contributing to the development and optimization of Android applications.

Android Developer InternShip   Dec 2023 - Jan 2024
[CodeClause](#)

During the training, I developed a series of practical applications using tools and technologies, including:
- [Chat App](#) : Developed using Firebase to handle user registration, real-time messaging, and cloud data storage.
- [Alarm App](#) : To set and customize alarms with options for time and sound preferences.
- [Note App](#) : A user-friendly app for adding, editing, and deleting notes efficiently.

Core Skills

Technical Skills
- **Jetpack Compose**, **Flow**, **Kotlin Coroutine**, **Kotlin**, **Room**, **Sqlite**, **MVVM**, **Retrofit**, **Okhttp**, **Dugger Hilt**, **Restful API**, **Xml**, **Java**, **Android SDK**, **Firebase**, **OOP**, **Data Structure**, **SOLID**, **Agile**, **Git / Github**.

Soft Skills
- **Problem-Solving, Respect Time, Continuous learning, Flexibility, Teamwork, Experienced in working with Figma, Have a background in design and color.**

Education

Bachelor's Degree of Computer Science   2019 - 2022
Suez Canal University

Full Stack Web Developer .Net   2021
Information Technology Institute (ITI)

Certificates

- **Kotlin for Android**, ITI Maharah tech
- **Android developer with Java**, Udemy
- **Git / Github Crash Course**, Udemy
- **Bachelor of Computer Science**, Suez Canal University
- **Web Developer with .Net**, Information Technology Institute (ITI)
- **Skills needed for the labor market**, FORSA

Languages

- Arabic (Native)
- English (B2 - Upper Intermediate)
